Notes and Potential Issues					
The following notes and warnings highlight missing or conflicting information which caused the validator to perform some guesswork prior to validation, or other things affecting the output below. If the guess or fallback is incorrect, it could make validation results entirely incoherent. It is <i>highly recommended</i> to check these potential issues, and, if necessary, fix them and re-validate the document.					
1. Using experimental feature: HTML5 Conformance Checker.					
	The validator checked your document with an experimental feature: <i>HTML5 Conformance Checker</i> . This feature has been made available for your convenience, but be aware that it may be unreliable, or not perfectly up to date with the latest development of some cutting-edge technologies. If you find any issues with this feature, please <u>report them</u> . Thank you.				
2.	Rare or unregistered chara	cte	encoding detected		
	The character encoding declared for supported by the validator, but man platforms. For the sake of interoper character encoding such as UTF-8 encodings. More information on declaring a chain your document can be found on	y no rabi , or o	ot be widely supported across lity, it is best to use a unicode one of the <u>registered character</u> cter encoding on your Web server	or
